Southwestern Institute of Physics (SWIP)

EDUCATION

Southwestern Institute of Physics (SWIP)

Sichuan, China

M.Eng. in Nuclear Science and Engineering

Aug.2026 - Jun.2029

University of Chinese Academy of Sciences (UCAS)

Beijing, China

Master Course in Astrophysics

Sep.2024 - Jun.2025

GPA:3.51/4.0. **Selected Coursework:** GermanII(97), GermanI(94), The Planetary Space Physics(94), Galaxies in the Universe(93), Fundamental Observational Astrophysics(92).

China West Normal University (CWNU)

Sichuan, China

B.Sc. in Physics

Sep.2019 - Jun.2023

Core Courses: Optics, Theoretical Mechanics, Electrodynamics, Thermodynamics and Statistical Physics, Quantum Mechanics, Linear Algebra, Methods of Mathematical Physics. *etc.*

Thesis: Using a new data mining algorithm to search for white dwarfs.

Outstanding Graduate of College of Physics and Astronomy (Top honor awarded at graduation).

RESEARCH EXPERIENCE

New data mining algorithms search for special and rare celestial bodies

Jun.2022 – Jun.2023

Innovation Practice Training Program of the National Astronomical Observatories, Chinese Academy of Sciences

- By relating the star's atmospheric model to its characteristics, the focus is on the two parameters of surface gravity and effective temperature. The least squares fitting program is used to compare with experimental data to analyze which spectral bands should be used in future white dwarf spectral selection.

China Space Station Project Sky Survey Telescope Galaxy Science Summer School

Jul.2023

The Kavli Institute for Astronomy and Astrophysics, Peking University

- Understand the basic information, overall progress, and survey data of the CSST project. Hands-on experience includes galaxy image photometric analysis and 2D decomposition of galaxy images.

Study of Color Correction in Multicolor Blackbody Spectra of Accretion Disks

Sep.2024 – Jun.2025

Student Innovation Practice Launch Program, UCAS

- Numerical calculations are used to theoretically explain the "color correction" phenomenon of multicolor blackbody spectra in accretion disks discovered in the field of high-energy astrophysics.

INTERNSHIP

Summer Practice Activity | Second Chair

Jan.2021 – Aug.2021

- In cooperation with Chengdu Linyin Public Welfare, students were selected from schools such as Gulin Middle School to carry out educational poverty alleviation in underdeveloped areas. The team performed excellently during the practice and won the titles of national key team and advanced individual.

Chengdu Shishi Shuangnan Experimental School | Physics Teacher&Head Teacher

Jan.2022 – Jun.2022

- Assisting teachers in completing teaching content and delivering lessons independently.

German Language Class at UCAS | Teaching assistant

Sep.2024 – Jun.2025

- Assisted the instructor in delivering lectures and responding to students' academic inquiries.

HONORS & AWARDS

Second - class Scholarship of CWNU (Top 20%)

Sep.2020、May.2022

Individual Scholarship of CWNU

Jun.2023

Outstanding student leaders of UCAS

Jun.2025

SKILLS

Programming & Data Analysis: Python (NumPy, SciPy, Matplotlib), C, Matlab.

Languages: Native Mandarin, English (CEFR B2-C1), German (CEFR B1-B2), Latin, Italian (CEFR A2-B1)
